INDUSTRIAL ENGINEER

PLANNING| PROCESS OPTIMIZATION | DATA ANALYSIS | SYSTEM ANALYSIS

Industrial Engineering graduate with experience in operations analysis, optimization modeling, and data-driven process improvement. Skilled in analyzing logistics and production systems, developing quantitative models, and supporting operational planning decisions. Interested in applying analytical and systems-oriented approaches to improve efficiency and operational performance.

EDUCATION

- **Hacettepe University** Ankara, Turkey **| Feb 2026 – Ongoing**
  M.Sc. in Industrial Engineering

- **Çankaya University,** Ankara, Turkey **| Aug 2019 – Jan 2025**
  B.Sc. in Industrial Engineering (English, Full Scholarship)

EXPERIENCE

United Parcel Service Inc. (UPS) Ankara, Turkey **| Jul 2024 – Aug 2024**

Industrial Engineering Intern, Operation Planning Department

- Analyzed manual small-package sorting operations and conducted a layout optimization study, achieving 14.35% improvement in operational efficiency.
- Developed an Excel VBA-based Personnel and Operations Data Tracking System, enabling structured monitoring of daily workforce performance and operational data.
- Performed short-term demand forecasting using historical package volume data to support operational planning and capacity considerations.
- Supported Root Cause Analysis (RCA) studies on delivery delays with the Operational Excellence team.

ASELSAN Electronic Industries Inc. Ankara, Turkey **| Aug 2023 – Sep 2023**

Industrial Engineering Intern, Production and Project Management Departments

- Gained practical experience in continuous improvement methodologies (Kaizen, Lean Manufacturing, 5S) within a mass production environment.
- Conducted work study and standard time analysis in cable assembly operation to evaluate productivity.
- Mapped cross-functional process workflows across Production, Production Planning, Supply Chain, and Project Management departments using flowcharts and prepared risk and improvement analysis reports to support process optimization initiatives.
- Gained practical experience with SAP and Primavera P6 in project planning, key performance indicators (KPI) monitoring, and resource utilization processes.

PROJECTS

Conveyor Flow Balancing and Truck Unloading Scheduling Optimization in Cross-Dock Cargo Operations (Graduation Project, *Team Leader)*

United Parcel Service Inc. (UPS) | ***Oct 2023 – Jul 2024***

- Analyzed cross-dock cargo sorting operations and developed a mathematical optimization model in GAMS to balance package flow across conveyor lines and optimize truck unloading schedules, aiming to stabilize operational flow and prevent bottlenecks within the transfer center.

TECHNICAL SKILLS

MS Excel (Advanced) | MS Office | SAP ERP | Minitab | SQL (Intermediate) | C# (Intermediate) | VBA | R (Basics) | Autodesk Inventor | Arena Simulation

LANGUAGES

Turkish – Native
English – Advanced
German – Basics
